

ZV 5 SPLITTER - IVS MM dual splitter

for
IVS (Integrated Video System)
ARRI 535 and 16 SR III cameras.

Application Example :

MINI MONITOR
12V

and

Video Transmitter
12V

LED shows
power status OK

In case of cable
wrong or shorted
LED goes
temporarily off,
due to
the protection of
the
self resetting fuse
inside .

It **protects** the **IVS MM socket**
from everyday's **plug-unplug**
of Mini Monitors connectors .

No more broken cable connections .

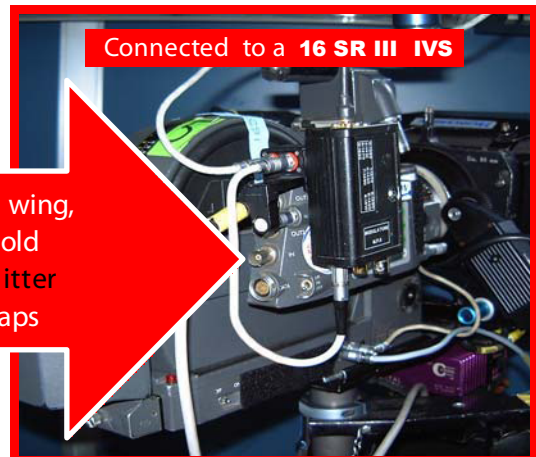

No disturbing external long cables .

Compact, ergonomic design .

No Video interference !

Convenient side wing,
designed to hold
VIDEO Transmitter
with Velcro straps

Connected to a **16 SR III IVS**

MINI MONITOR and VIDEO Transmitter
should be latest state of the art ,
Low power devices .

Both **MUST** not exceed
maximum IVS Amp rating !

Allows a MINI MONITOR plus a VIDEO Transmitter
to be connected into **IVS MM socket** .

Dual sockets are
self resetting fuse protected .
Designed for maximum convenience
for handheld shooting.
